

SIDI MOHAMED SAWADOGO

UNIVERSITÉ DE MONTRÉAL
Department of Economics

Email: sidi.mohamed.sawadogo@umontreal.ca

Phone: +1 514 804 8299

Homepage: sidi-sawadogo.github.io

Status: Canadian Permanent Resident

Education

- 2021–27 **Université de Montréal**
Ph.D. in Economics, expected 2027
- 2016–19 **École Nationale de la Statistique et de l'Analyse Économique (ENSAE)**
M.Sc. in Statistics and Economics, *Ingénieur Statisticien Économiste*, with distinction
Flagship five-year degree; admission by competitive examination
- 2013–16 **Université Nazi Boni (ex. Université Polytechnique)**
B.Sc. in Mathematics, with distinction
Ranked first nationally among Mathematics graduates in Burkina Faso; *Bourse Intermédiaire*

Fields

Primary Industrial Organization; Econometrics.

Secondary Applied Microeconomics; Public Economics.

Job Market Paper

“Build or Subsidize? The Welfare Effects of Deployment and Affordability Subsidies in U.S. Broadband”

Sole-authored. Finalist, 2025 Bank of Canada Graduate Student Paper Award.

Affordability (ACP) and deployment (BEAD) subsidies are *complements, not substitutes*: ACP lowered prices 7–10% in served, low-income markets, while BEAD relaxes infrastructure constraints in unserved and monopoly markets, delivering about \$26 in welfare gains per dollar over 25 years (25.9–27.4) versus near break-even for ACP. Evidence: a structural model of broadband demand, pricing, and entry (170,419 products, 66,454 census tracts), with entry fixed costs bounded by a moment-inequality estimator. Build where deployment is uneconomic, then subsidize affordability where price still binds. [\[Paper\]](#) [\[Replication guide\]](#)

Working Papers

“Efficient and Debiased Estimation of Dynamic Discrete Choice Models”

Sole-authored. Neyman-orthogonal, debiased estimators for dynamic discrete choice models that remain $\sqrt{n}$ -consistent and asymptotically normal under machine-learning first-stage estimates. [\[SSRN\]](#)

“Target-Population Fragility in Judge IV under Average Monotonicity” with Mohamed Coulibaly

Average-monotonicity assumptions in judge-IV designs leave the implied target population fragile, so the estimated effects lack a stable interpretation. [\[Paper\]](#) [\[Appendix\]](#)

Selected Works in Progress

- “**Selection on Structural Errors in Moment-Inequality Estimation of Discrete Games**”
with Mohamed Coulibaly
- “**Fintech Entry and Agent Selection in Mobile Money Markets: Evidence from Senegal**”
- “**Semiparametric Identification and Estimation in Binary Choice Models**” with Mathieu Marcoux and Max Lesellier

Fellowships, Grants, and Awards

- 2026–27 Ph.D. Scholarship, Maison des Affaires Publiques et Internationales, FAS [[Portrait \(FR\)](#)]
- 2025 Finalist, Bank of Canada Graduate Student Paper Award
- 2025–26 J.W. McConnell Foundation Chair Scholarship in American Studies
- 2024–26 Fonds de recherche du Québec, Société et culture (FRQSC) Fellowship, ranked 2nd
- Earlier Ph.D. Fellowship, Economics & CIREQ (2021–24); Bourse d’excellence des citoyens du monde, Laval (2020); World Bank Vice President’s Program for African Statistical Schools (2019–21); Scholarships of Excellence, ENSAE and Université Nazi Boni.

Presentations

- Invited Competition Bureau of Canada, Gatineau (2025); Bank of Canada Graduate Student Paper Award Workshop, Ottawa (2025).
- 2026 African Econometric Society Conference (Cairo); AMIE Workshop; CIREQ; Industrial Organization Study Group (Montréal).
- 2024–25 Canadian Econometrics Study Group Annual Meeting (Toronto); CIREQ Econometrics Conference (Montréal); Congrès SCSE (Orford); QPESF Workshop; Industrial Organization Study Group; CIREQ-UdeM Seminar.

Experience

Employment

- 2019–21 **Economist Consultant, World Bank**
Co-authored the Mali and Chad Poverty Assessments on growth, resilience, and poverty reduction, and the Gambia Economic Update, informing country policy dialogue.

Teaching, Université de Montréal

- Instructor ECN1260 Econometrics (BA), Fall 2025; ECN1000 Principles of Economics (BA), Summer 2025 and Summer 2023.
- Teaching Assistant ECN6350 Econometrics (graduate), Fall 2025 and 2024; ECN2160 Econometrics (BA), Winter 2025; ECN1000 Principles of Economics (BA), Fall 2023; ECN7061 Probability for Economists (Ph.D.), Fall 2022.
- Evaluations Student evaluations of 3.6–3.9/4 across four evaluated courses (2023–2025), at or above the department average in every course since 2024, in sections of 20 to 217 students.

Skills

- Methods Structural IO; dynamic discrete choice; moment-inequality and simulation-based estimation; semiparametric methods; policy evaluation.
- Computing R, Stata, Python, MATLAB; GIS; reproducible research workflows; high-performance computing on Digital Research Alliance of Canada clusters; $\text{\LaTeX}$.
- Training Reproducible Research Fundamentals, World Bank.
- Languages French (native); English (fluent: research, graduate coursework, and conference presentations in English; teaching primarily in French).
