

# SIDI MOHAMED SAWADOGO

UNIVERSITÉ DE MONTRÉAL  
Department of Economics

Email: [sidi.mohamed.sawadogo@umontreal.ca](mailto:sidi.mohamed.sawadogo@umontreal.ca)

Phone: +1 514 804 8299

Homepage: [sidi-sawadogo.github.io](https://sidi-sawadogo.github.io)

Citizenship: Canadian

---

## Education

- 2021–27     **Université de Montréal**  
Ph.D. in Economics, expected 2027
- 2016–19     **École Nationale de la Statistique et de l'Analyse Économique (ENSAE)**  
M.Sc. in Statistics and Economics, *Ingénieur Statisticien Économiste*, with distinction
- 2013–16     **Université Nazi Boni (ex. Université Polytechnique de Bobo)**  
B.Sc. in Mathematics, with distinction

## Fields

- Primary     Industrial Organization, Econometrics
- Secondary   Applied Microeconomics, Public Economics

## References

## Job Market Paper

### “Build or Subsidize? The Welfare Effects of Deployment and Affordability Subsidies in U.S. Broadband”

*Sole-authored.* Finalist, 2025 Bank of Canada Graduate Student Paper Award.

Affordability (ACP) and deployment (BEAD) subsidies are *complements*, not *substitutes*: ACP lowered prices 7–10% in served, low-income markets, while BEAD relaxes infrastructure constraints in unserved and monopoly markets, delivering about \$26 in welfare gains per dollar over 25 years (25.9–27.4) versus near break-even for ACP. Evidence: a structural model of broadband demand, pricing, and entry (170,419 products, 66,454 census tracts), with entry fixed costs bounded by a moment-inequality estimator. Build where deployment is uneconomic, then subsidize affordability where price still binds. [\[Paper\]](#) [\[Replication guide\]](#)

## Working Papers

### “Efficient and Debiased Estimation of Dynamic Discrete Choice Models”

*Sole-authored.* Neyman-orthogonal, debiased estimators for dynamic discrete choice models that remain  $\sqrt{n}$ -consistent and asymptotically normal under machine-learning first-stage estimates. [\[SSRN\]](#)

### “Target-Population Fragility in Judge IV under Average Monotonicity” with Mohamed Coulibaly

Average-monotonicity assumptions in judge-IV designs leave the implied target population fragile, so the estimated effects lack a stable interpretation. [\[Paper\]](#) [\[Appendix\]](#)

### *Selected Works in Progress*

**“Selection on Structural Errors in Moment-Inequality Estimation of Discrete Games”**

with Mohamed Coulibaly

**“Fintech Entry and Agent Selection in Mobile Money Markets: Evidence from Senegal”**

### **Fellowships, Grants, and Awards**
