

Sidi Mohamed Sawadogo

Ph.D. Candidate in Economics • Université de Montréal • On the 2026–2027 economics job market

sidi.mohamed.sawadogo@umontreal.ca • sidi-sawadogo.github.io • +1 514 804 8299

Status: Canadian Permanent Resident.

Education

- 2021–27 Ph.D. in Economics, Université de Montréal (expected 2027); GPA 4.12/4.30
- 2016–19 M.Sc. in Statistics and Economics, *Ingénieur Statisticien Économiste*, ENSAE’s flagship five-year degree (competitive-exam entry), with distinction École Nationale de la Statistique et de l’Analyse Économique (ENSAE), Dakar
- 2013–16 B.Sc. in Mathematics, ranked first nationally among graduates (Burkina Faso); *Bourse Intermédiaire* Université Nazi Boni, Bobo-Dioulasso

Fields

Primary Industrial Organization; Econometrics.

Secondary Applied Microeconomics; Public Economics.

Job Market Paper

“Effects of Subsidies on Welfare and Market Structure in the U.S. Broadband Industry”
Sole-authored. Finalist, 2025 Bank of Canada Graduate Student Paper Award. Affordability (ACP) and deployment (BEAD) subsidies are *complements, not substitutes*: ACP lowered prices 7–10% in served, low-income markets, while BEAD relaxes infrastructure constraints in unserved and monopoly markets, delivering a 25-year benefit–cost ratio of about 26 (25.9–27.4) versus near break-even for ACP. The findings come from a structural model of broadband demand, pricing, and entry, using 170,419 products across 66,454 census tracts, with entry fixed costs bounded by a moment-inequality estimator. Build where deployment is uneconomic, then subsidize affordability where price still binds. [\[Paper\]](#) [\[Replication guide\]](#)

Working Papers

“Efficient and Debiased Estimation of Dynamic Discrete Choice Models” *Sole-authored.* Neyman-orthogonal, debiased estimators for dynamic discrete choice models that remain $\sqrt{n}$ -consistent and asymptotically normal under machine-learning first-stage estimates. [\[SSRN\]](#)

“Target-Population Fragility in Judge IV under Average Monotonicity” with Mohamed Coulibaly Average-monotonicity assumptions in judge-IV designs leave the implied target population fragile, so the estimated effects lack a stable interpretation. [\[Paper\]](#) [\[Appendix\]](#)

Work in Progress

“Fintech Entry and Agent Selection in Mobile Money Markets: Evidence from Senegal”

“Selection on Structural Errors in Moment-Inequality Estimation of Discrete Games”
with Mohamed Coulibaly

Fellowships, Grants, and Awards

2026–27	Ph.D. Scholarship, Maison des Affaires Publiques et Internationales, FAS [Portrait (FR)]
2025	Finalist, Bank of Canada Graduate Student Paper Award
2025–26	J.W. McConnell Foundation Chair Scholarship in American Studies
2024–26	Fonds de recherche du Qu'ébec, Soci'et'e et culture (FRQSC) Fellowship, ranked 2nd [Record]
Earlier	Ph.D. Fellowship, Economics & CIREQ (2021–24); Bourse d'excellence des citoyens du monde, Laval (2020); World Bank Vice President's Program for African Statistical Schools (2019–21); Scholarships of Excellence, ENSAE and Université Nazi Boni.

Presentations

Invited	Competition Bureau of Canada, Gatineau (2025); Bank of Canada Graduate Student Paper Award Workshop, Ottawa (2025).
2026	African Econometric Society Conference (Cairo); AMIE Workshop; CIREQ; Industrial Organization Study Group (Montr'eal).
2024–25	Canadian Econometrics Study Group Annual Meeting (Toronto); CIREQ Econometrics Conference (Montr'eal); Congr'es SCSE (Orford); QPESF Workshop; Industrial Organization Study Group; CIREQ-UdeM Seminar.

Experience

Employment

2019–21	Economist Consultant, World Bank Co-authored the Mali and Chad Poverty Assessments (growth, resilience, poverty reduction) and the Gambia Economic Update, informing country policy dialogue. [Mali] [Chad] [Gambia]
---------	--

Teaching, Université de Montréal

Instructor	ECN1260 Econometrics (BA), Fall 2025; ECN1000 Principles of Economics (BA), Summer 2025 and Fall 2023.
Teaching Assistant	ECN6310 Econometric Theory (PhD), Fall 2025 and 2024; ECN2160 Econometrics (BA), Fall 2026, 2025, and 2024; ECN7061 Probability for Economists (PhD), Fall 2022.

Skills

Methods	Structural IO; dynamic discrete choice; moment-inequality and simulation-based estimation; semiparametric methods; policy evaluation.
Computing	R, Stata, Python, MATLAB; GIS; reproducible research workflows; high-performance computing on Compute Canada clusters; $\text{\LaTeX}$.
Training	Reproducible Research Fundamentals, World Bank. [Certificate]
Languages	French (native); English (fluent; graduate coursework, teaching, and research conducted in English).
